

01

Rich and Varied

We're a multi-disciplinary business with full service creative, video and video brochure production capabilities making us a rare beast in the category.

Time in the Game

We were there at the birth of the video brochure business and modesty aside there's not much we don't know about it.

03

The Company we Keep

We're not a budget based, corner cutting company so we attract the kind of company that demands the very best in video brochures.

A Quality Story

Our quality control is second-to-none so we only use the very best components assembled within our own strictly supervised factory facility.

05

Safety First

Cheap lithium batteries can pose a fire risk. We only use the best so you can be safe in the knowledge you have a product that complies with strict Australian Standards.

If any or all of the reasons above help you in the decision making process, give us a call today and we'll give you even more reason to go with Razor.
